## Meet Lyle & Josh

Your Trusted Welding & Fabrication Team

With more than 70 years of combined hands-on experience, Lyle and Josh bring unmatched expertise to every job. Their deep background includes extensive power piping fabrication and installation in some of the most demanding environments – oil refineries, fertilizer plants, and food processing facilities.

This real-world experience means they understand not just how to weld, but how to build solutions that are strong, safe, and built to last for decades. Whether it's a small repair or a large-scale project, you can count on professional results every time.

## AWS Certified Welders

Our team consists of American Welding Society (AWS) certified welders who are also power piping weld certified. We maintain the highest standards in the industry so your project meets all required codes and quality expectations.

## Comprehensive Welding & Fabrication Services

We offer a full range of professional welding processes to tackle any job:

- **Stick (SMAW)**
- **TIG (GTAW)**
- **MIG (GMAW)**
- **Flux Core**
- **Brazing**

From delicate precision work to heavy structural welding, we have the right process for your specific needs.

## Machine Shop

Our fully equipped machine shop allows us to create custom parts and components that are no longer available on the market. We have:

- **Lathe**
- **Mill**
- **Sheet metal brake**
- **Shear**
- **Roll**
- **CNC Plasma Table**

This equipment gives us the ability to fabricate or repair almost anything out of metal.

## Steel Building Construction

We design and build custom steel buildings, including:

- **Barndominiums**
- **Grain elevators**
- **Workshops**
- **Agricultural buildings**
- **Commercial structures**

Aluminum Dock Ramp

Leg Rebuild

Custom Built Conveyor

## Why Choose Us

### Why Customers Trust Us With Their Projects

Decades of proven experience in both industrial and custom fabrication  
AWS and power piping certifications for peace of mind

Ability to create custom parts that are no longer manufactured

Mobile and shop capabilities – we come to you or bring your project to our shop

High-quality workmanship that lasts

Honest, straightforward service you can depend on

Whether you need a small repair, a custom prototype part, or an entire steel building, we take pride in delivering strong, clean, and professional results every single time.

### Have Questions About a Project?

If you see a photo in this brochure and want to know more, simply take a picture of it with your phone and text it to us. We'll be happy to tell you exactly what it is and how we can help with a similar project.
